

How to connect your school Ipad to your home network

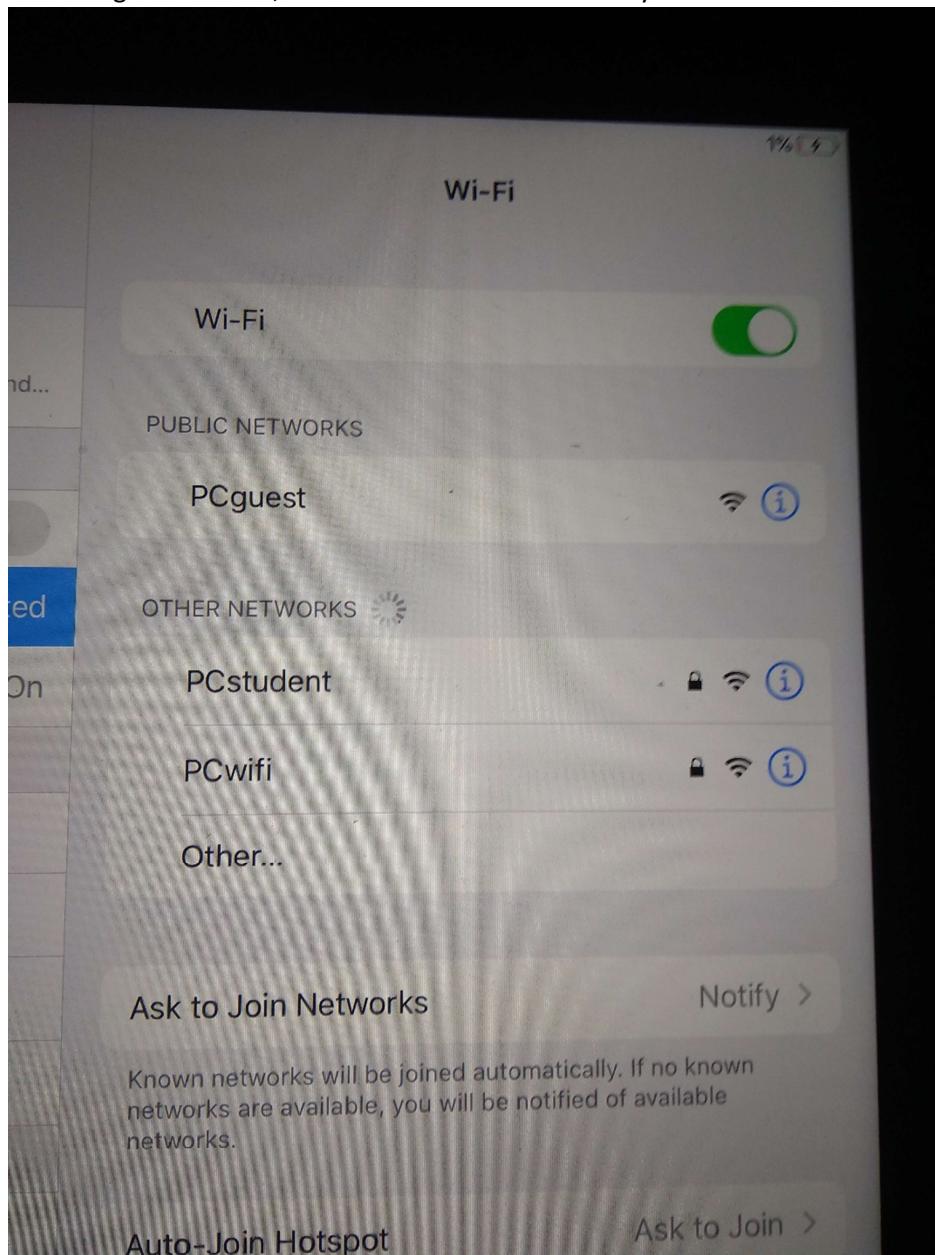

- 1) Turn on and click on the home button or do the slide (whichever the Ipad says to do) to get to the main home screen.
- 2) Click on the settings icon (you may need to swipe to other pages to find the icon). It looks like this:

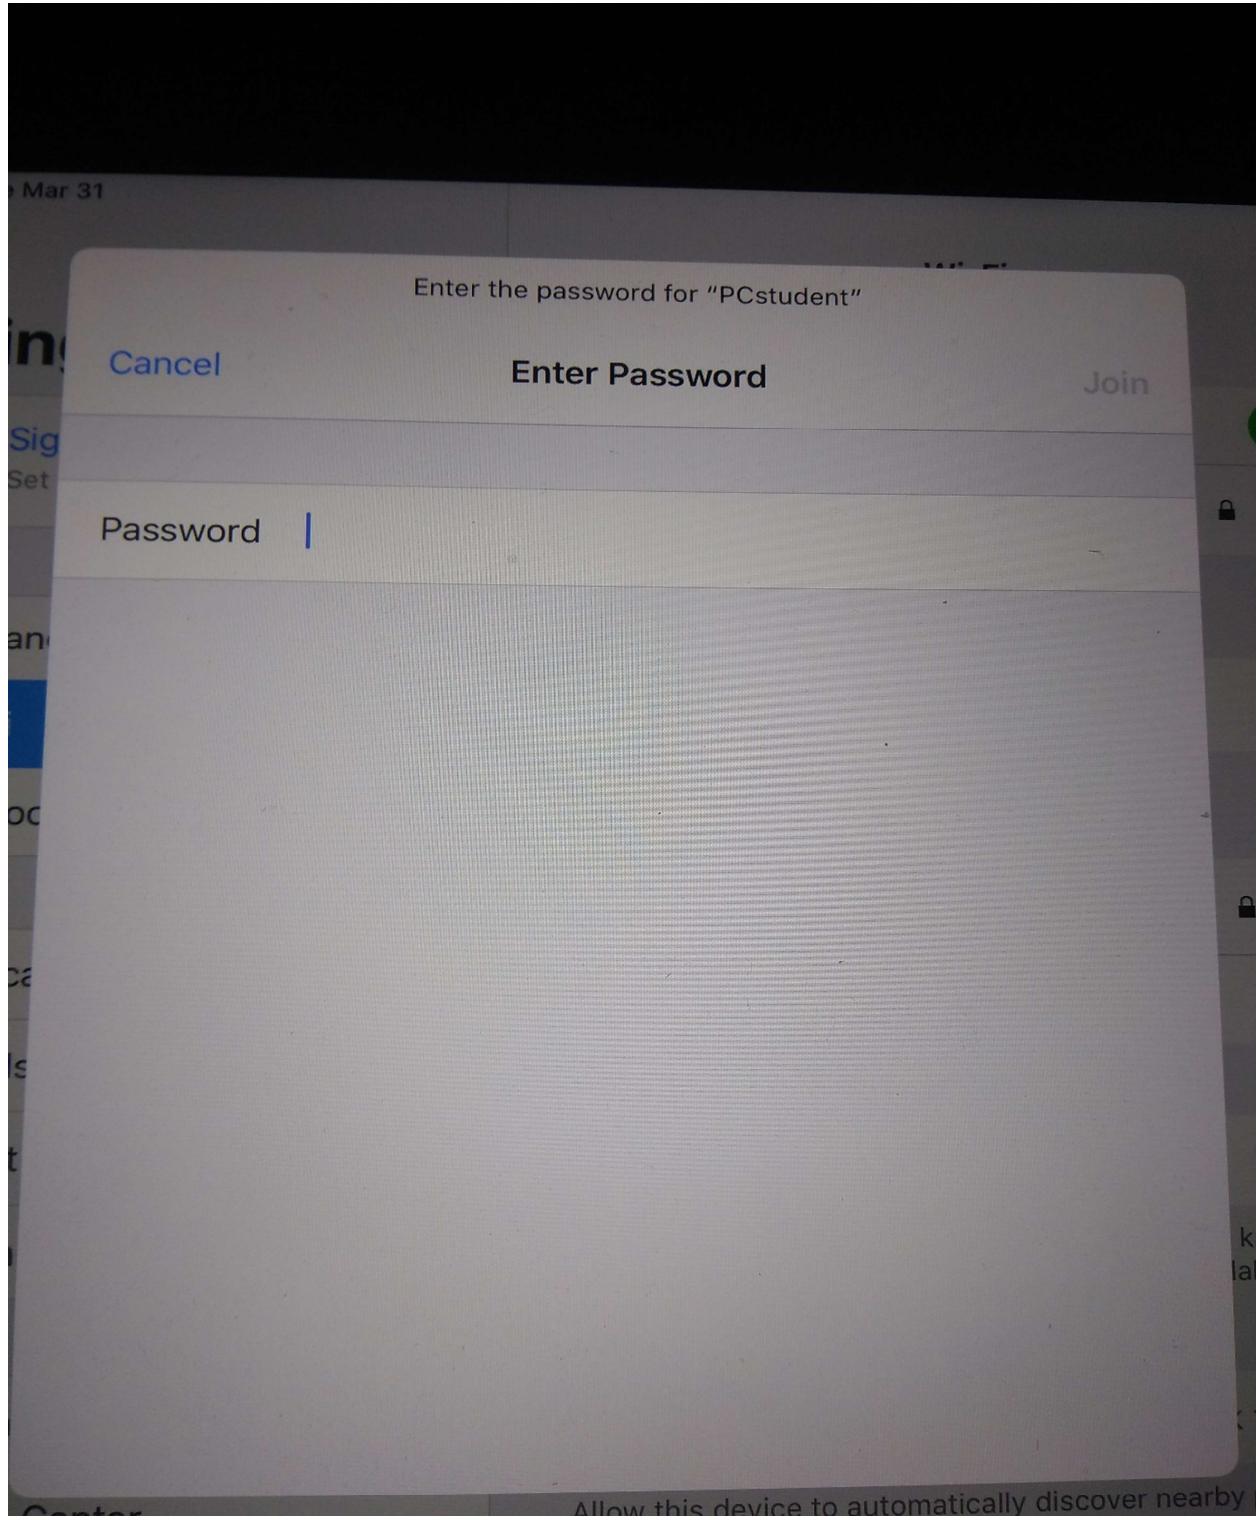

- 3) Once in settings, on the left hand side click on WiFi:

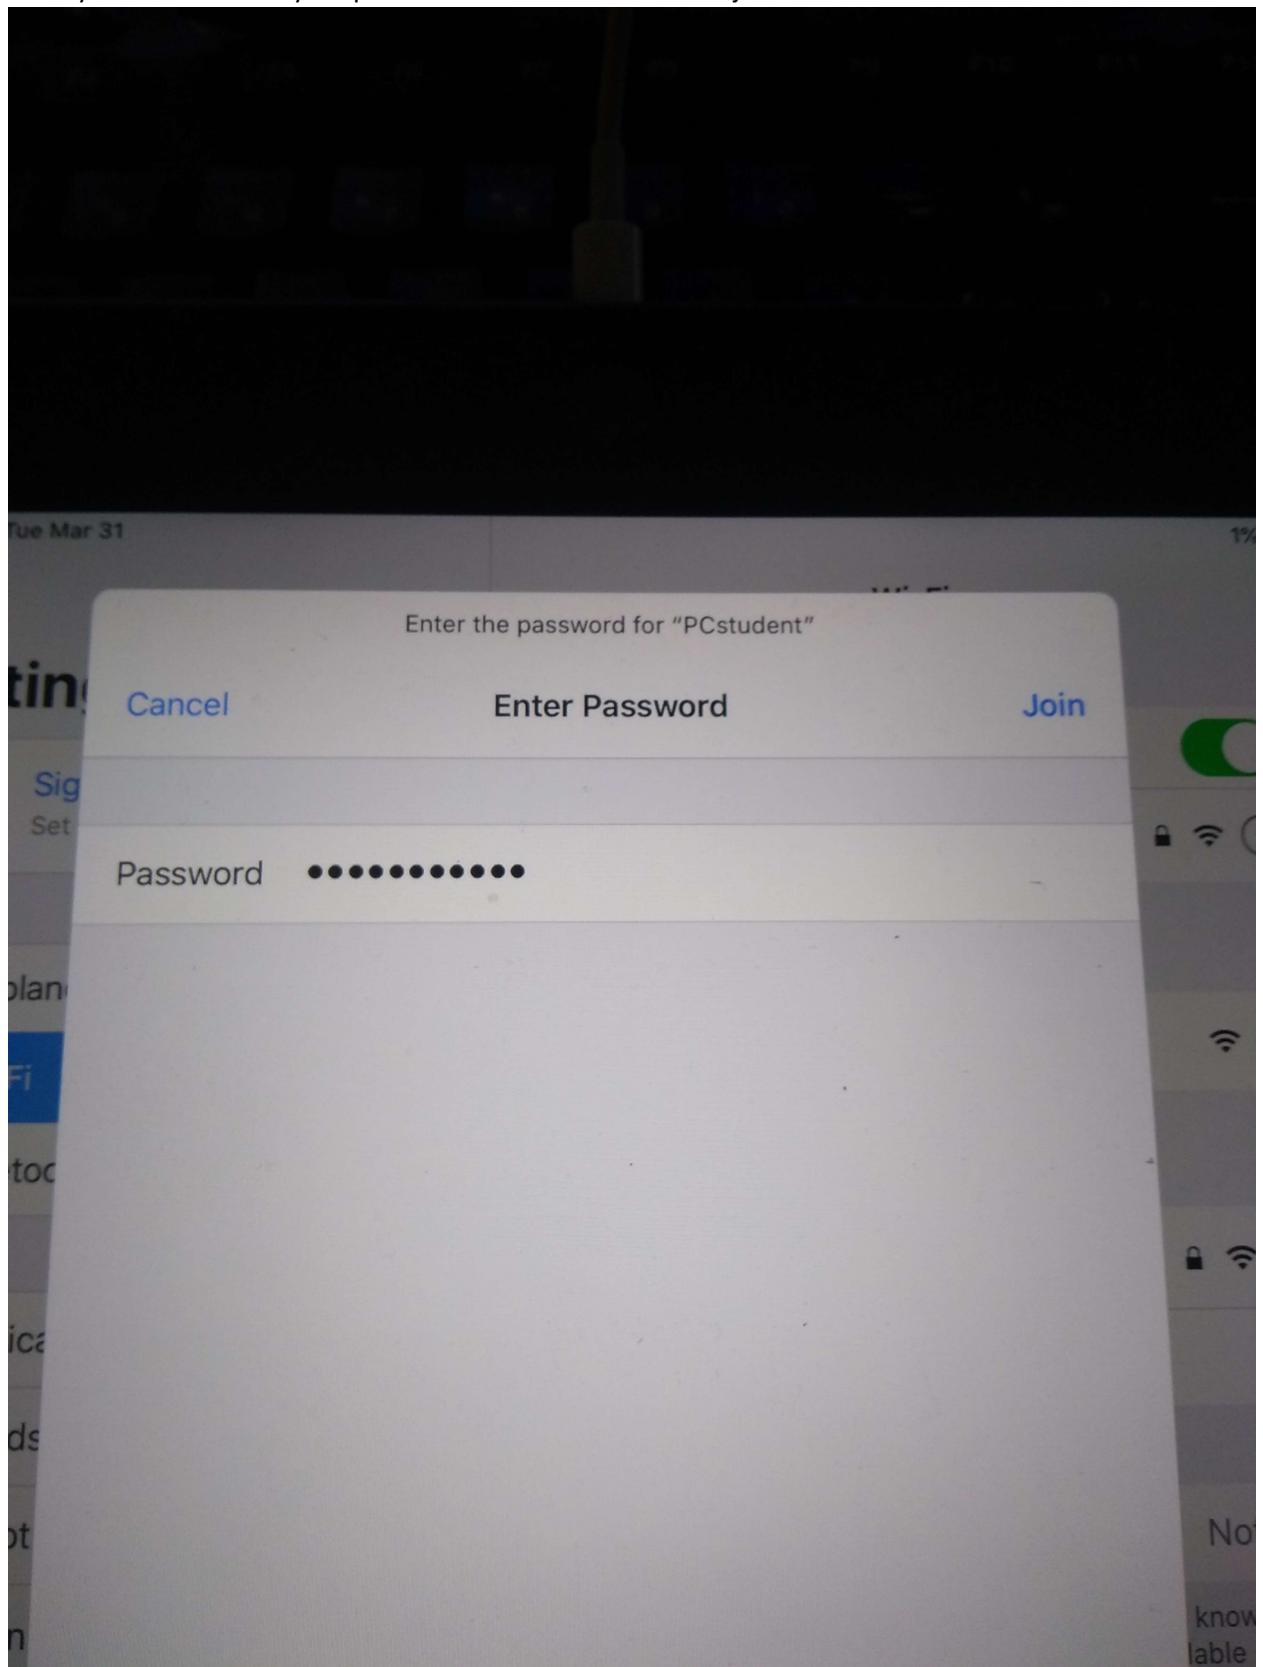

- 4) On the right hand side, find and click on the name of your home network:

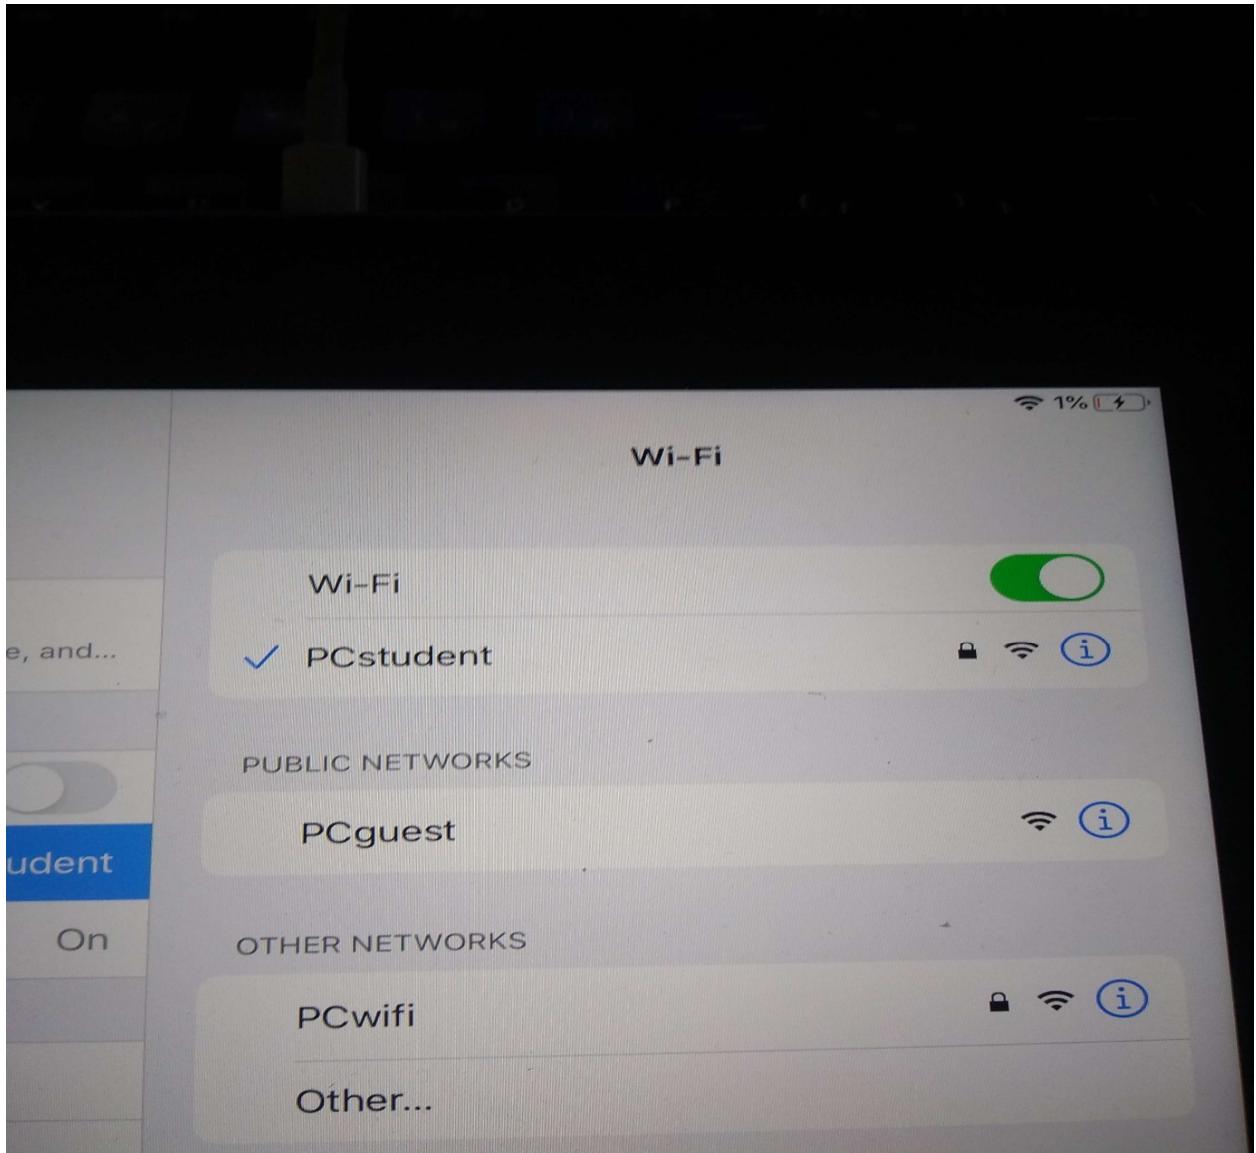

- 5) This will then ask you to enter the password for your home network (if your network has a password):

- 6) Once you have entered your password click on the now blue join icon:

- 7) Once you have a checkmark next to your network name you are connected and ready to use your Ipad:

Additionally, if your student has any technical issues with their device, please contact the student's teacher who will submit the issue to the tech department. The tech department will then contact you if needed.
